

## ANTARES CHARTS    CORRECTIONS AND CAUTIONS 2022

Our current set of charts is **Antares Charts 2022**: the following **Corrections** and **Cautions** relate to issues identified after its publication. Corrections will be reflected in our next set of charts, expected to be published in January 2023. All Corrections and Cautions are subject to the Conditions posted on this website.

**NB** The 2020 and all earlier chart sets have been superseded by the 2022 set (there was no 2021 set and no 2019 set) and we strongly recommend that only the current set should be used.

**NB** Hydrographic surveying and cartography are not precise sciences. There will be errors and misleading representations on our charts as well as those published by others. Please read the sections on our website: 'Making the charts', 'Using the charts' and the 'Conditions'. Take great care at all times but especially if away from the routes described by the sailing directions.

### ***Issues relating to charts in the current 2022 set:***

**January 2022: Correction: Chart 5604A, edition 2, Scalasaig, Colonsay:** CalMac, the harbour authority for Scalisaig, has banned all anchoring within the harbour limits. These are shown on the official chart and are defined approximately by an arc extending a third of a nautical mile from the pierhead: this is well outside the area covered by our chart.

### ***Issues arising from 2022 surveys and reports, to be published as new or revised charts in 2023:***

None as yet.
